Karen, Elena, and the rest of the folks at Elemed have put together an incredible mentoring program. It has been so fun to meet the other mentees and engage with them in roundtables and workshops! There are mentees from all over the world and hearing their experiences has made me feel like a part of a community, especially with the increased isolation measures from COVID. The speakers have been excellent and even though the program is only halfway through I have already taken away so many tips and tricks for networking, managing up, and making better connections with people. The mentor I am paired with is great! She has been through a lot of what I am going through now and is able to commiserate and give valuable advice. Her perspective has helped me to see some of the challenges I faced from a different viewpoint and alter my strategy. I cannot say enough positive things about this program, I am so happy I found it! I 100% recommend the Elemed Mentoring Academy to anyone looking to find a role model and make more connections in their career.
